

# Full Job Description

## Project Manager - (Segmental Structure)

### Description

### About Us

At MGCPL, we specialize in engineering and construction services. While we are most well-known for adding beauty and structure to communities through high-performance Roads & Highways, Railways and smart infrastructure, we provide much more than that. We create an unshakable foundation for progress because our multidisciplinary teams also include, economists, builders, analysts and Management professionals. That's why we believe diversity is our greatest strength. MGCPL is proud to be an equal opportunity workplace and an affirmative action employer.

We believe that the way we work can add meaning and value to the world. That ideas inspire positive change. That colouring outside the lines can illuminate fresh perspectives. And that small details yield important realizations. Above all, we believe that collaboration is the best way forward.

### Primary Responsibilities

In the role of Project Manager, we'll count on you to:

- **Work on projects that typically include bridge (Casting & Erection work, segmental), for High speed railway projects.**
- **Hands full experience in Metro, Bridge Project under precast segmental work.**
- Plan and manage all aspects of small to medium single-discipline engineering projects or large, routine projects
- Foster and develop client relationships for yourself and your staff
- Independently coordinate work of engineers and balance planning team throughout entire project's development
- Establish client relations and be involved with marketing, contractual, design and production meetings
- Track financial aspects of projects and coordinate or adjust work effort with team to ensure that work is completed within parameters of agreed-to schedule
- Collaborate with peers and team members to create a cohesive practice
- Select standard bridge engineering/design procedures, develop structural details using specialized structural design and analysis software, and perform structural load calculations and assist with geometric layout and quantity development
- Review, assign work and/or check design calculations, estimates, and specifications produced by junior engineers and G.E.T's
- Mentor younger staff and support continued development
- Perform other duties as needed

### Qualifications

- Bachelor degree in Civil Engineering is required.

### Experience & Other preference

- A minimum of 15+ years experience in structure including segmental bridge.
- Proficiency with Microsoft Office software and Auto cad.
- Demonstrated leadership skills, communication skills and ability to work with various teams

- Project management skills including project scheduling
- Strong communication skills and willing to work in a team environment

### **Why MGCPL**

At MGCPL, we know work isn't only about who you work for it's also about what you do and how you do it. Led by the strength of our values and a culture shaped by employee ownership, we network with each other, build on each other's contributions, and collaborate together to make great things possible. When you join MGCPL, We help you take charge of your career, giving you multiple growth opportunities along the way.
